About me

I am a front-end JavaScript developer with focus on becoming a full stack JavaScript developer using MERN stack. I love programming and learning JavaScript was probably one the best thing that has ever happened to me. I am a hard worker and when I see my projects come to life, it just gives me the feeling that I cannot describe in words, and I am happy to use my knowledge in professional field.

Projects

1: Bucket list

A MERN stack website, I have used NodeJS, express and mongo dB for backend and react for frontend as well as JWT for user authentication.

2: World clock

A front-end website using HTML, CSS and JAVASCRIPT and I have also used the current date object of JavaScript and different time zones to get the current time of the required country.

Live demo: [world clock]

3: Currency converter

A front-end website using HTML ,CSS, JavaScript and a currency API which I have used to fetch live updated forex rate to use in the website in real time.

Live demo: [currency converter]

4: Travel Guru

A front-end website using HTML, AND BOOTSTRAP

Live demo: [Travel Guru]
